

UHF PC Hard anti-metal tag

UHF PC hard anti-metal tag, made of ABS+PC mixed material injection molding, through ultrasonic welding, with high temperature resistance, impact resistance and other characteristics. The working frequency is: 860~960MHz, which can be used worldwide. It can support silk screen printing, laser, code writing, etc. Widely used in Crate management, Outdoor communication equipment management, Outdoor power asset management.

Specifications

Parameter	Technical Specs
Product model	PVCJ900
Product dimension(mm)	70*30*5.0
Product material	Alloy plastics
Weight(g)	10
Color	Gray, blue, yellow, red
Operating temperature	-30°C to +110 °C
Protocol	ISO/IEC18000-6C&EPC C1 G2
Operating frequency	860~960MHz
EPC	128 bits
Product readability	2~5 M
Data Retention	> 10 years
The number of erases	100,000 times
Encapsulation process	Ultrasonic welding
Service Life	> 2 years
Installation	Adhesive backing, screws
Environmental Standards	RoHS
Attachment processes	Silk screen printing, laser, data writing
