

UHF four-hole rigid label

UHF four-hole rigid label, made of alloy material injection molding, by ultrasonic welding, has the characteristics of high temperature resistance, impact resistance and so on. The operating frequency is: 860~960MHz, which can be used worldwide. It can support screen printing, laser, code writing, etc. Widely used in Pallet management, Turnover box management, Fixed asset management, Warehouse shelf management.

Specifications

Parameter	Technical Specs
Product dimension(mm)	75*45*3.4
Product material	Alloy plastic
Weight(g)	17
Color	Grey, blue, yellow, red
Operating temperature	-20°C to +150 °C
Protocol	ISO/IEC18000-6C&EPC C1 G2
Operating frequency	860~960MHz
EPC	96bits
Product readability	6~10 meters
Data Retention	> 10 years
The number of erases	100,000 times
Packaging process	Ultrasonic welding
Service Life	> 2 years
Installation	Adhesive backing, screws
Environmental Standards	RoHS
Accessory processes	Printing, laser, writing data
