

UHF on-metal tag

UHF on-metal tag, using a unique antenna design, so that it can have superior reading performance in metal environment, working frequency: 860~960MHz, can be used worldwide. It can support silk screen printing, laser, code writing, etc. Widely used in Pallet management, Crate management, Asset management, Warehouse shelving management

Specifications

Parameter	Technical Specs
Product dimension(mm)	135*22*12
Product material	ABS
Weight(g)	15
Color	Black, gray, yellow, red
Operating temperature	-20°C to +80 °C
Protocol	ISO/IEC18000-6C&EPC C1 G2
Operating frequency	860~960MHz
EPC	96 bits
Product readability	6~10 meters
Data Retention	> 10 years
The number of erases	100,000 times
Packaging process	Ultrasonic
Service Life	> 2 years
Installation	Adhesive backing, screws
Environmental Standards	RoHS
Accessory processes	Printing, laser, writing data
